Temporary Fire Protection System

WES3 Wireless Temporary Fire and Evacuation Alarm System.

WES3 wireless temporary system that has been developed to provide a simple, fast and secure method of communicating fire and medical emergencies in complex environmental conditions.

- **Completely wireless** battery operated system
- **Simple to install**, use and maintain
- **Manual push button** for fire and medical emergencies
- **24/7 protection** with automatic smoke and heat sensors
- **Easily integrates** with other systems on-site.
- **IP55 rated**, suitable for outdoor use
- **Full 4G connectivity** enabling off-site communications
- **Remote monitoring** via REACT

Setup is quick and easy – it takes just a few minutes for your units to be on active duty protecting your site.

Smoke Sensor

Incorporating dust-resistant smoke sensors into your WES3 network gives you early notification in the event of fire whilst eliminating false alarms caused by dust.

Heat Sensor

Incorporating heat sensors into your WES3 network allows you to receive automatic activations 24/7 in the event of fire.

Call Point

Manual Call Point allows a fire/evacuation alarm to be raised from any unit on site, to initiate a site-wide alarm. It also includes a medical alert button.

Interface

Allows WES3 to be seamlessly integrated with third party systems, such as permanent fire alarms, Building Management Systems, standpipe flow switches, etc.

Connect

Connect is the real brains behind the WES3 system that enables full management and real-time diagnostics/ alarm activations for any connected unit in the network.

Link

A simple repeater unit that boosts the radio signal capability in particularly large, complex or high-density sites.
