**WES**

24/7 Site-Wide Monitoring

Industry's leading wireless alarm system combined with monitoring and response.

The demand to monitor fire and emergencies on sites and out-of-hours, is ever increasing. When there is no one present to raise an alarm, automatic alarm activation, coupled with a rapid response is key to protecting your site. With **our monitored alarm solution** in place, your WES3 system will send alerts to a connected alarm-receiving centre, where they can quickly alert named key holders in the event of an alarm activation.

- **24/7 365 days** a year alarm monitoring
- **Rapid response** to alarm activations
- **Save money** by reducing on-site security guards
- **Complete peace of mind** that your site is protected around-the-clock

Protecting your people and property around-the-clock.

Smoke Sensor

Incorporating dust-resistant smoke sensors into your WES3 network gives you early notification in the event of fire whilst eliminating false alarms caused by dust.

Heat Sensor

Incorporating heat sensors into your WES3 network allows you to receive automatic activations 24/7 in the event of fire.

Call Point

Manual Call Point allows a fire/evacuation alarm to be raised from any unit on site, to initiate a site-wide alarm. It also includes a medical alert button.

Interface

Allows WES3 to be seamlessly integrated with third party systems, such as permanent fire alarms, Building Management Systems, standpipe flow switches, etc.

Connect

Connect is the real brains behind the WES3 system that enables full management and real-time diagnostics/alarm activations for any connected unit in the network.

Link

A simple repeater unit that boosts the radio signal capability in particularly large, complex or high-density sites.
