WES

SHIP BUILDINGS

24/7 Protection

WES3 Wireless Evacuation and Emergency Alarm System.

WES3 is a fully customizable wireless evacuation and emergency alarm system that has been specifically engineered to deliver the highest standards of compliance while meeting the complex safety challenges presented at shipyards and on ships themselves during building work.

- **Completely wireless** battery operated system
- **Simple to install**, use and maintain
- **Manual push button** for fire and medical emergencies
- **24/7 protection** with automatic smoke and heat sensors
- **Easily integrates** with other systems on-site.
- **IP55 rated,** suitable for outdoor use
- **Full 4G connectivity** enabling off-site communications
- **Remote monitoring** via REACT

WES

Easy set-up that requires no special tools or expertise. Protection that's ready when you are.

Smoke Sensor

Incorporating dust-resistant smoke sensors into your WES3 network gives you early notification in the event of fire whilst eliminating false alarms caused by dust.

Call Point

Manual Call Point allows a fire/evacuation alarm to be raised from any unit on site, to initiate a site-wide alarm. It also includes a medical alert button.

Connect

Connect is the real brains behind the WES3 system that enables full management and real-time diagnostics/alarm activations for any connected unit in the network.

Link

A simple repeater unit that boosts the radio signal capability in particularly large, complex or high-density sites.

Heat Sensor

Incorporating heat sensors into your WES3 network allows you to receive automatic activations 24/7 in the event of fire.

Interface

Allows WES3 to be seamlessly integrated with third party systems, such as bilge sensors, permanent fire alarms, Building Management Systems, standpipe flow switches, etc.
