

Protect Your Holiday Park with WISE Wireless Security Alarm Solution

WISE Wireless Security Solution

Enhance Safety and Security for Your Holiday Park with WISE Wireless Security Solutions.

Ramtech has been providing security solutions to holiday parks throughout the UK for more than three decades. With our WISE Wireless Security Alarm System, you can have complete peace of mind knowing that your Holiday park and holiday homes are being monitored 24/7. In case of a security threat, our system sends an immediate alert with the precise location of the alarm activation, enabling you to respond promptly. Moreover, we can help you create additional revenue streams to optimise your park’s profitability.

Benefits of WISE

With WISE, you can enjoy a range of benefits that are tailored to meet the specific challenges faced by the holiday park market. These benefits include:

- 24/7 Security monitoring for complete peace of mind
- Instant alert in the event of an alarm activation
- Create new revenue streams for your park
- Fully inclusive service and support
- Online tracking of alarm history
- Dedicated wireless network - no Wi-Fi required

Creating Additional Revenue Streams for Your Holiday Park

Join the ranks of two of the largest holiday park groups who have harnessed the power of WISE to unlock substantial additional revenue. By implementing our state-of-the-art security solution and offering yearly subscription fees, they have experienced a significant boost to their bottom line.

With WISE, you have the opportunity to offer our comprehensive security system to your holiday home owners through an annual subscription. This creates a recurring income stream that adds to your park’s profitability year after year.

The table below illustrates the amount of money you can generate with our security system based on the number of holiday homes in your park and the annual subscription fee:

Pitches	Alarm Revenue	Subscription Revenue
250	£25,000	£12,500
500	£50,000	£25,000
750	£75,000	£37,500
1000	£100,000	£50,000

Note: Park revenue based on £100.00 per alarm install and £50.00 per subscription

Hassle-free Security Solution

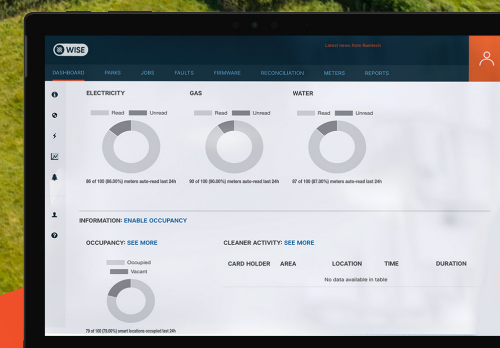

We provide a stress-free security solution that covers everything from installation to ongoing maintenance. With our security solution trusted by holiday parks all over the country and a proven track record, you can trust that your Holiday Park is in good hands. Our team of experts will provide you with continuous service and support, ensuring that your WISE Security System is always in perfect working order.

How WISE Works

With our WISE Security Solution, your Holiday Park can stay ahead of any potential security threats. Our wireless network connects all WISE alarms on park to a central base station, giving you real-time notifications and precise location data in the event of an alarm activation. This means your team can respond quickly, ensuring the safety of your guests and property. And, with no need for Wi-Fi, WISE is perfect for parks with limited connectivity.

WISE Base Station

Monitor your park from your mobile, laptop, or
tablet at any time and from anywhere .

WISE Range at a Glance

Empowering Safety, Efficiency, and Revenue Generation.

Discover the WISE range of innovative solutions that go beyond security, offering comprehensive site monitoring capabilities. With WISE, you can enhance safety measures at your holiday park while gaining invaluable insights to optimize operations and unlock new revenue opportunities. Powered by long-life batteries and utilising Ramtech's radio technology, WISE can be installed in remote areas, ensuring comprehensive coverage across your entire park, including secluded cabins.

Indoor Hub - Comprehensive Security and Intelligent Insights

The WISE Indoor Security Hub connects to the park's WISE Platform, enabling real-time monitoring. Not only does it serve as a security alarm, alerting you to any activations, but it also offers intelligent insights into your business. From monitoring occupancy levels to receiving cleaner completion notifications, leverage the Indoor Hub's capabilities to enhance your operational efficiency.

Outdoor Hub - Efficient Staff Management and Proof of Presence

Manage your staff and contractors effectively with the WISE Outdoor Hub. This versatile tag-on and tag-off system provides a reliable solution for various industries and roles, ensuring accurate record-keeping and "proof of presence" tracking.

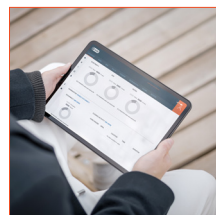

Mobile Security Alarm - Portable Protection and Exceptional Flexibility

Experience ultimate flexibility with the WISE Mobile Security Alarm. This portable device offers secure asset protection and enables alerts that enhance customer service, all without the need for cables or complex installations. Monitor key areas such as bars, shops, tool sheds, receptions, and storage areas effortlessly, enjoying discreet yet effective protection.

Panic Buttons - Instant Access to Help in Critical Situations

In critical situations, every second counts. WISE incorporates panic buttons for quick access to emergency assistance, providing peace of mind and rapid response when it matters most.

WISE Monitoring Dashboard - Real-Time Insights and Comprehensive Monitoring

Empower your business with the WISE Monitoring Dashboard, a powerful platform that provides real-time alerts, data, and information. Stay informed about security coverage, fire safety, occupancy monitoring, and staff management, ensuring proactive decision-making and efficient operations.

REACT - Real-Time Alert App for Swift Response

REACT, our real-time alert app designed to keep your team in the know. In the event of alarm activation, relevant staff receive instant alerts, including the precise location where the alarm was triggered. This enables quick response and ensures incidents are addressed promptly and effectively.

WES3 Wireless Fire Alarm System

Our wireless fire alarm system is a modern alternative to outdated fire bells, providing instant alerts for a faster and more effective response. Quick and easy to install with no disruptive wiring or drilling, our system is fully compliant with all relevant safety regulations, ensuring your guests and staff are protected.

Benefits of the WES3 system

- Completely wireless with 3-year battery.
- Simple to setup, install, and reposition.
- Long range mesh radio network.
- Fire and medical alert function.
- 24/7 protection with smoke/heat sensors.
- Easily connects with other systems on-site.
- 4G connectivity for offsite communication.
- Remote monitoring via REACT.
